Docket: 30-30691/90-01

Barnett Industrial X-Ray  
ATTN: Mr. Loyd Barnett  
P.O. Box 1991  
Stillwater, Oklahoma 74076

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Anthony D. Gaines of this office on January 9, 1990, of the activities authorized by NRC Byproduct Material License 35-26953-01, and to the discussion of our findings held by the inspector with you at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

During this inspection, certain of your activities were found not to be conducted in full compliance with NRC requirements. Consequently, you are required to respond to this matter in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

Except for the violation noted in the enclosed Notice of Violation, your licensed program appears to be operating in accordance with our regulations. The quarterly audits of your program, performed by your radiation safety officer, are being sent to this office in a timely manner, and based on the results of this inspection, seem to be effective in keeping your program in compliance with license requirements.
