Docket No. 50-334

Mr. C. N. Dunn  
Vice President, Operations Division  
Duquesne Light Company  
225 Sixth Avenue  
Pittsburgh, Pennsylvania 15219

Dear Mr. Dunn:

This letter is in regard to the auxiliary river water system at Beaver Valley Power Station Unit No. 1 that is to become operational on or before December 31, 1976. Concerning this system, we request that you submit an application for an amendment to the Facility Operating License No. DPR-66, to include Technical Specifications which define the limiting condition for operation, the surveillance requirements, and the bases for the limiting conditions for operation and surveillance requirements.

The application should be submitted on or before November 1, 1976. Since the safety analysis and safety evaluation regarding plant operation with the auxiliary river water system has already been documented in the Final Safety Analysis Report for Beaver Valley Unit 1 and the NRC staff's Safety Evaluation Report and its Supplements, no safety evaluation is required in support of your application.

If you have any further questions regarding this matter, please contact us.

Sincerely,

Original Signed by

John F. Stolz

John F. Stolz, Chief  
Light Water Reactors Branch No. 1  
Division of Project Management
