Dear Mr. Kingsley:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-327/89-29 AND 50-328/89-29)

This refers to the Nuclear Regulatory Commission (NRC) routine monthly inspection conducted by K. Jenison from December 5, 1989 - January 9, 1990. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. These areas included operational safety verification, followup of events, maintenance and surveillance activities. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appear to violate NRC requirements. The identified violation involved a failure to follow procedure regarding implementation of the corrective action program. The violation, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

Your attention is also invited to the Unresolved Items identified in the inspection report. Several apparent weaknesses were observed in your safety evaluation process and an NRC Bulletin response which warrant additional NRC review. These items will be addressed during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter, its enclosures, and any reply will be placed in the NRC's Public Document Room.

The responses directed by this letter and its enclosures are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
