

February 9, 1990

Docket No. 50-382

Mr. J. G. Dewease  
Senior Vice President - Nuclear Operation  
Louisiana Power and Light Company  
Post Office Box 60340  
New Orleans, Louisiana 70160

Dear Mr. Dewease:

SUBJECT: IMPLEMENTATION CONFIRMATION OF ACTIVITIES ASSOCIATED WITH NRC  
GENERIC LETTER 89-13 (TAC NO. 74081)

By letter dated January 29, 1990, Louisiana Power and Light Company (LP&L) responded to Generic Letter 89-13 on service water systems. In our Generic Letter, we requested that licensees inform the NRC within 30 days, following the implementation of activities. The LP&L response included several activities which will be performed including walkdowns and review of maintenance activities.

From our review of your January 29, 1990 response, the 30-day implementation letter remains outstanding. It is requested that LP&L reference the Generic Letter 89-13 and TAC No. 74081 in that response.

Sincerely,

/s/

Frederick J. Hebdon, Director  
Project Directorate IV  
Division of Reactor Projects - III  
IV, V and Special Projects  
Office of Nuclear Reactor Regulation
