

OFFICE OF THE
SECRETARY

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

January 12, 1990

MEMORANDUM FOR: James M. Taylor, Executive Director
for Operations

FROM: *13* Samuel J. Chilk, Secretary

SUBJECT: SECY-89-355 - PROPOSED LICENSE, UNDER
10 CFR PART 72, FOR DRY CONCRETE MODULE
STORAGE OF SPENT FUEL AT DUKE POWER
COMPANY'S (DPC'S) OCONEE NUCLEAR
STATION SITE

This is to advise you that the Commission (with all Commissioners agreeing) has approved the issuance of the proposed license to Duke Power Company. Accordingly, the staff may proceed to issue the license.

The Commission also requests that the staff inform the Commission of Duke Power Company's decommissioning plan after it has been received and reviewed by the staff.

(EDO) (SECY SUSPENSE: 9/30/90)

Section 2.2.5.2 of the SER indicates that the ISFSI training requirements will be incorporated into the Oconee training program but it does not indicate whether the details of the training process and procedures will be evaluated by INPO evaluation and accreditation renewal teams or by NRC inspectors. The staff should provide the Commission with more information on the generic expectations or requirements for training personnel responsible for the "operation" of ISFSI's.

(EDO) (SECY SUSPENSE: 1/31/90)
