Gentlemen:

Nuclear Regulatory Commission (NRC) staff has not received a response from Combustion Engineering (CE) to our August 31, 1988, letter with comments on CE's August 1987, revision of your Topical Safety Analysis Report for the Combustion Engineering Dry-Cap Cask for an Independent Spent Fuel Storage Installation (Dry Storage). Since there has been no progress on this review since 1988, I am requesting that CE either respond to our August 1988, letter or withdraw its topical report by March 30, 1990.

If NRC staff receives no response from you by March 30, 1990, NRC staff will terminate this review and destroy proprietary material submitted and docketed under this project.

Sincerely,  
Original Signed by
