Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(INSPECTION REPORT NO. 50-325/89-44 AND 50-324/89-44)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by William H. Ruland on December 1, 1989 - January 5, 1990. The inspection included a review of activities authorized for your Brunswick facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are described in the enclosed Notice of Violation.

The first violation described in the enclosed Notice is similar to two other violations contained in Notices sent to you by our letters dated April 6 and September 22, 1989. Because "similar violations," as described in the NRC Enforcement Policy are of significant concern to the NRC, please give particular attention in your response to the identification of the root cause of this problem and your corrective action to prevent recurrence. The NRC recognizes that you have yet to fully implement your clearance task force recommendations, yet you continue to have clearance problems. Therefore, this subject has been added to the management meeting agenda scheduled at the Brunswick site for March 29, 1990.

The enclosed Inspection Report documents an oral commitment (see paragraph 13) made by a licensee representative and discussed in the exit interview. If your understanding of this commitment differs from the report statements, please inform this office promptly.
