Docket Nos. 50-338, 50-339
License Nos. NPF-4, NPF-7

Virginia Electric and Power Company
ATTN: Mr. W. L. Stewart
Senior Vice President - Nuclear
5000 Dominion Boulevard
Glen Allen, VA 23060

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-338/89-35 AND 50-339/89-35

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by J. L. Caldwell on November 18, 1989 - January 3, 1990. The inspection included a review of activities authorized for your North Anna Power Station. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed inspection report describes apparent violations relating to containment integrity and reportability which are under consideration for escalated enforcement action. Accordingly, no Notice of Violation is being issued at this time for the apparent violations in these areas. However, please be advised that the characterization of these apparent violations described in the enclosed inspection report may change as a result of further NRC review. An Enforcement Conference to discuss these apparent violations has been scheduled for February 27, 1990. You will be advised by separate correspondence of the results of our deliberations on these matters. No response is required at this time.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
