Gentlemen:

Subject: Summary of Deficiencies Report of the October 12-13, 1989 Pilgrim
Nuclear Power Station Offsite Radiological Emergency Response Exercise

This letter transmits the Federal Emergency Management Agency (FEMA) Summary of Deficiencies Report of the October 12-13, 1989 Pilgrim Nuclear Power Station full participation emergency exercise.

The report indicates that two deficiencies were identified. The Massachusetts Emergency Operations Center was issued a deficiency for not demonstrating FEMA Objective 3, (demonstrate the ability to direct, coordinate and control emergency activities), and for not demonstrating FEMA Objective 13, (demonstrate the ability to coordinate the formulation and dissemination of accurate information and instruction to the public in a timely fashion after the initial alert and notification has occurred). The report further indicates that the State must conduct a remedial drill within approximately 60 days to demonstrate the correction of the deficiencies concerning FEMA Objectives 3 and 13.

If you have any questions concerning this matter, please contact Mr. Craig Conklin of my staff at (215) 337-5342.

Sincerely,

Dear Mr. Boulay:

We have enclosed three copies of the Summary of Deficiencies Report for the Pilgrim Nuclear Power Plant Exercise of October 12-13, 1989. This summary is forwarded to the State in accordance with Federal Emergency Management Agency (FEMA) guidance on exercises. The State must schedule and conduct a remedial exercise within approximately 60 days to correct the observed deficiencies.

If you have any questions concerning the scope of the remedial exercise or the enclosed report, please call Jack Dolan at 617-223-9567.

Sincerely,

Richard H. Strome
Regional Director
