Vice President, Nuclear  
Skyway Tower  
400 North Olive, L.B. 81  
Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by Messrs. R. A. Caldwell and A. B. Earnest of this office during the period January 8-17, 1990, of activities authorized by NRC Construction Permits CPPR 126 and CPPR 127 (Units 1 and 2) for the Comanche Peak Steam Electric Station, and to the discussion of our findings with members of your staff at the conclusion of the inspection.

The inspection reviewed certain areas of your physical security program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The areas inspected and the inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified. It should be noted that although a formal audit of the security program is not required prior to licensing, the pre-operational audit performed by the TU Electric quality assurance department and discussed in paragraph 5 of this report was considered shallow and ineffective in uncovering security program weaknesses.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

The material enclosed herewith does not contain Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is not prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will be placed in the Public Document Room.
