License No. 24-18625-01
License No. 24-17998-01

Gentlemen:

This refers to the routine safety inspection conducted by J. W. Patterson of this office on January 10 and 11, 1990, of activities authorized by NRC Byproduct Material Licenses No. 24-18625-01 and No. 24-17998-01, and to the discussion of our findings with you and members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined corrective actions, regarding the apparent violation found during our December 17 and 18, 1985 inspection. We have no further questions regarding this matter.

During this inspection, certain of your activities under License No. 24-18625-01 appeared to be in violation of NRC requirements, as specified in the enclosed Notice and a written response is required. No violations were identified for License No. 24-17998-01.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
