Docket Nos. 50-277
50-278

Philadelphia Electric Company
ATTN: Mr. C. A. McNeill
Executive Vice President-Nuclear
Correspondence Control Desk
P. O. Box 7520
Philadelphia, Pennsylvania 19101

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Final Report
Number 50-277/88-99; 50-278/88-99

This letter forwards the final Peach Bottom Atomic Power Station SALP Report (Enclosure 1) for the period August 1, 1988 through June 30, 1989. The SALP Board Report was initially forwarded to you by our September 7, 1989 letter (Enclosure 2) and our evaluation was discussed with Mr. J. Paquette, yourself and members of your staff at a meeting on September 18, 1989, at your Conference Center in Delta, Pennsylvania. Based upon the discussions at that meeting and your written response (Enclosure 3), we concluded that no substantive changes to the original SALP Board Report were warranted. One editorial change was made.

Our overall assessment indicated effective management oversight and involvement resulting in continued improvement in performance in several functional areas. Most noteworthy was the significant turnaround in performance in the security and safeguards area.

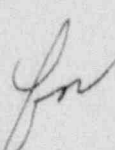

As discussed at the SALP management meeting and again at the October 23, 1989 meeting referenced in your SALP response, we acknowledge your efforts and/or plans to improve the identified weaknesses noted in our assessment. This includes your plans to improve the training facilities and your efforts to improve performance in the area of emergency preparedness corporate support.

No reply to this letter is required. Your actions in response to the NRC Systematic Assessment of Licensee Performance will be reviewed during future inspections of your facility.

We appreciate your cooperation.

Sincerely,

Original Signed By:
Thomas T. Martin

William T. Russell
Regional Administrator
