Washington, D.C. 20555

Dear Sir:

I live in Alaska and I have been informed about the Plutonium Shipment flying over our state and how hazardous it could be if the plane carrying it crashed. I think that shouldn't be happening if it is going to endanger our state and people. Although, if it is going to fly over our state, it should be in a safe casket, so if it were to crash, it could withstand heavy impact and fire. Adopting Sen. Murkowski's plan Nureg 0360 would be a great help for our state.

Sincerely,

Sara [Signature]
