OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

801 Plymouth Cir
Wasilla, AK 996
February 7, 1990

Dear Sir:

I am a concerned citizen residing in Wasilla, Alaska and I read about the Plutonium that might be transported over our state. The containers that the plutonium is being transported in are clearly unsafe. They will not hold up in event of a fire or crash. If this happens our water will be polluted and cancer will plague the citizens living in Alaska. I've also read that plutonium will stay radioactive for thousands of years. This means that life in Alaska will be practically non-existent. If the plutonium must fly over our state then you could use the standards set in the Murkowski Amendment (NUREG 0360) instead of the standards set by the IAEA.

Sincerely,
Jason Strang
