OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Dear Sir,

I do not like the idea of an airplane filled with plutonium flying over Alaska. If the airplane crashed in one of Alaskas bays all the fish and animals could die. And we've already had a couple of oil spills.

We don't need a plutonium spill too. If we had our water contaminated by plutonium alot of fish and animals would die. The casts should be fire proof because if the airplane crashed and caught on fire the cast would burn and blow up and then we would have an air pollution. Thankyou for listening

Sincerely,
Thon Durgan.
