OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Dear Sir:

I am a concerned Alaskan. I am concerned about the plutonium being flown over Alaska. This is a bad idea because the plain could crash and this could cause a disaster. This could end up just like the Exxon Oil Spill. If that wasn't bad enough than this would be even worse because plutonium stays radio-active for thousands of years. I think the plutonium plain should take another route. The time the oil spill happen, people didn't think that that it was true but, they were wrong. How do we know this plain isn't going to crash? That's what they said about the Exxon Valdez. This could destroy or have varied amounts of affects on our environment. If it comes to the subject that you have to fly over Alaska, then at least make sure it's in a good sealed container, as the one supported by Sen. Murkowski's amendment.

0360

Sincerely,
Carl Dickerson
