DOCKETING & SERVICE
BRANCH

Docketing and Service Branch
U.S. Nuclear Regulating Commission
Washington, D.C. 20555

Dear Sir:

I am writing to you about
Sen. Murkowski's amendment
(NUREG 0360). It is about Japan's
wanting to fly their plutonium
over Alaska. I am for Sen.
Murkowski's stricter standards.

I know that if the plane
were to crash land in Alaska
and the container leaked, the
animals would get cancer and
the plants would die or be
contaminated. If the plutonium
does leak out the people of
Alaska won't be able to eat the
animals or the plant. We
won't be able to for thousands of
years because of the radiation.

I strongly disagree about

9003010346 900206

planes flying over Alaska,
but if they do, please make
sure they have good and
strong containers.

Sincerely,
Wusty Smith
