US Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir,

I am writing this important letter to insure Alaska of safety from Plutonium Shipments.

I understand that the Japanese need Plutonium to run their nuclear dependant country but I am quite sure they wouldn't mind safer containers in case of a crash. I do not wish to destroy Alaska's beautiful, wild environment with nuclear energy. Did you know that African Swans migrate every year to this state? A whole species would be destroyed by neglect of safer cases for shipments of Plutonium. I do not wish for this to happen. Please accept Sen. Murkowski's amendment (Nureg 0360) and save Alaska for future generations.

Sincerely,

Jennie Smith

DSB
