Docketing and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir,

I am in support of Senator
Murkowski's amendment for strict
regulations on plutonium containers
(NUREG 0360) instead of IAEA standards.

I support the amendment
because plutonium is poisonous for
thousands of years and causes all
types of cancer, whether ingested into
the lungs or through a puncture
in the skin. I have lived in
Alaska all of my life and have
seen many of the beauties it holds.
I hope that doesn't change because
of unsafe plutonium containers.

Sincerely,
Ali J. J. J.
Document Specialist
