Dear Sir:

I am very concerned about having plutonium flown over Alaska. It is an extreme danger to us. If so the plane were to crash and the container was not safe, radiation will be in Alaska for thousands of years. The container holding the plutonium should be able to withstand the pressure if the plane should crash. I don't approve of having plutonium flown over Alaska at all, but if it has to, please follow Murkowski's amendment (NUREG 0360). There might be no way to test the container but try!!! Remember that this is concerning lives!!!

Sincerely,

Blossom Asato
