Dear Sir:
I agree with Senator Mur-
kowski. I hope that
you will not send
the plutonium over our
state. If the plane came
down it would kill
many people. The pluto-
nium causes all kinds
of cancer, and not many
people like the idea. It
(plutonium) is a ~~radioactive~~
active for 100,000 ~~years~~
of years. Lot of people
would get cancer and
maybe some other
disease. Also it could
not only explode if
you crash it can

DS10

also explode with
a hard push of pressure.
So if you have to
bring that cancer
causing, radioactive,
explosive, plutonium
over our state of
Alaska, please, please
be careful. We don't
want our wildlife
destroyed or our water
polluted. So if you
come over our state
put the plutonium
in a safe container.

(NUREG-0340)

I thank you
