Docketing and Service Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Dear sir:

I am writing to you about nuclear energy or so called Plutonium, that the planes are flying over Alaska. I am concerned because if one of the planes crashes the plutonium will go in the air and it causes cancer in the body of humans and animals. We don't want a population of animals to die off, because of you not listening to us. It also kills vegetation. So I think you, at the U.S. Nuclear Regulatory Commission, should put the plutonium in a sealed tight container, so that heat or cold cannot make it open. I think you should listen to Sen. Murkowski's amendment (number 0360) instead of IAEA. He is Alaska's Senator you should listen to him; he knows what the people want.

Sincerely,
Theresa
Vaughn
