Washington, D.C. 20555

Dear Sir,

I'm an 8<sup>th</sup> grader at  
Wasilla Jr. High School, and  
we have been talking about  
the plutonium flying over  
the state, and Murkowski's  
ammendment for stricter  
regulations on the containers  
that its going to be in.

I'm writting to support  
Sen. Murkowski's ammendmen  
(HUREG 0360) instead of  
IAEA standards.

Acknowledged by card.....

DS10

If something was to happen and the plane had to make a crash landing and one of the containers, or worse yet, all of the containers broke open, do you know the damage that would be done to the state of Alaska?

Alaska has a lot of beautiful beaches, forests and wildlife. The Exxon oil spill has already damaged enough of our beautiful attractions, please don't make another disaster for our state. Short cuts aren't always best. But if you absolutely have to fly over our state please use safer containers to hold the plutonium

I have lived in Alaska  
for close to 9 years now,  
and I plan on living here  
for another 9 years, please  
don't make us all move  
away cause of contaminated  
lakes + wildlife, and the cancer  
that the plutonium could  
cause if spilt.

Thank you. ☺

Sincerely,  
Deanna Ray
