Mr. John P. Roberts
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, Maryland 20852

Dear Mr. Roberts:

Nuclear Assurance Corporation hereby requests that the Topical Safety Analysis Report for the 31-Assembly NAC-S/T storage cask, Project M-52, be withdrawn and that the proprietary volumes of the application be destroyed. NAC believes that the current market for cask storage does not warrant licensing of the 31-assembly version of the NAC-S/T cask at this time. If the market should change, NAC might resubmit the report but recognizes that this would constitute a new Project. NAC appreciates your cooperation in withdrawing this application and closing the review file.

Should you have any questions or require additional information, please contact me at (404) 447-1144.

Sincerely,

NUCLEAR ASSURANCE CORPORATION

Alan H Wells
