Gentlemen:

Subject: Docket Nos. 50-206, 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 1, 2 and 3
10 CFR 50.54(p) Changes
Safeguards Contingency Plan, Revision 8

This letter forwards Revision 8 to the U. S. Nuclear Regulatory Commission (NRC) approved August 1983 "Safeguards Contingency Plan, San Onofre Nuclear Generating Station, Units 1, 2 and 3," for NRC review under 10 CFR 50.54(p).

In response to Generic Letter (GL) 89-07, a new Safeguards Contingency Threat Situation (SCTS) B1-B was introduced in Safeguards Contingency Plan (SCP), Revision 7. SONGS Security, in coordination with Facilities Management, recently conducted a security drill implementing SCTS B1-B. This drill used the SCP guidance and procedures which were developed to meet the requirements GL 89-07, and described in Revision 7 to the SCP. Actual drill performance confirmed the adequacy and applicability of the SCE short term contingency plan for defence against a surface vehicle bomb. Several "lessons learned" during the conduct and critique of this drill have been incorporated into Revision 8.

Accordingly, enclosed are four copies of Revision 8, plan textual changes, for review. Two copies are also forwarded by this letter to the Regional Administrator, NRC, Region V.

The changes described in the enclosure and its attachments do not decrease the safeguards effectiveness of this plan.

The attachment to the enclosure contains "Safeguards Information" and must be protected under 10 CFR 73.21.

Sincerely,

H. E. Morgan
for H. E. Morgan
