Department of the Army
Darnall Army Community Hospital
ATTN: Colonel Claypool, Hospital Commander
Fort Hood, Texas 76544-5063

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Anthony D. Gaines of this office on January 25-26, 1990, of the activities authorized by NRC Byproduct Material License 42-19113-01, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

During this inspection, certain of your activities were found not to be conducted in full compliance with NRC requirements. Consequently, you are required to respond to this matter in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We have reviewed the dose calibrator records you provided, which were in storage during the inspection, and have determined that they met requirements. It was noted during the inspection that your radiation safety committee (RSC) meetings were comprehensive and discussed pertinent issues. The inspector also observed that the RSC meeting minutes were extensive and documented the audits of your program.
