

9-30-97

Dear Ms. McGaffigan,

I am deeply concerned that Northeast Utilities is unable to operate their Millstone Nuclear Power plants in a safe and prudent manner. By NU's own admission the Corrective Action Program is not working, NU is now able to identify problems, but is still unable to implement the necessary corrective action to fix the problems. NU should not be allowed to re-start any of their Millstone plants until they can competently manage this important and safety program.

I urge you to not allow NU to re-start Millstone Unit #3 in January.

Thank you.

Max Wentworth
