U.S. NUCLEAR REG.
COMMISSION
SPECIAL SECTION

Mr. Paul Quinn
Material Licensing Branch
Division of Fuel Cycle and
Material Safety
U. S. Nuclear Regulatory Commission
7915 Eastern Avenue
Silver Spring, Maryland 20907

Dear Mr. Quinn:

Re: License 29-15364-01
Amendment 18

The referenced Amendment effectively released us from licensing responsibility for a portion of a building we were leasing. The area--hot cells, storage pools and a portion of warehouse--were known to our landlord as the "front area". We sent him a copy of Amendment 18 and received the enclosed reply.

I would like to impore upon you to send us--or Electro-Protective Corporation directly--a letter which in effect states that Isomedix has met all the criteria for unrestricted release of the subject area, as described in the enclosed floor plan.

Thank you.

Very truly yours,

ISOMEDIX, INC.

President
Isomedix, Inc.
80 S. Jefferson Road
Whippany, New Jersey 07981

Dear George:

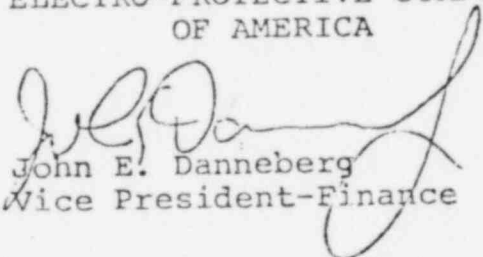

Thank you for the correspondence from the NRC. Congratulations!

I believe the letter from the NRC is going to create problems with my insurance company. I think they will demand something a little clearer and more straight forward concerning the front area lease.

I would appreciate you trying to get the NRC to put something in writing that would solve the problem.

Very truly yours,

ELECTRO-PROTECTIVE CORPORATION
OF AMERICA

John E. Danneberg
Vice President-Finance
