PROPOSED RULE RM 50-5etal

45FR 5393 (15)

18520 S.W. 88 Road
Miami, Florida 33157

September 17, 1980

Secretary
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attn: Docketing & Service Branch

Subject: Restart of GESMO

Gentlemen:

Please be advised that I favor the resumption of the reprocessing of spent fuel and the proposed use of mixed oxides in Light Water Reactors.

It is imperative that the United States of America does all it can to minimize its use of foreign oil, and materially extend its uranium reserves by the reprocessing of spent fuel.

I am opposed to the present Administrations' policy of not reprocessing spent fuel, as well as their anti-breeder philosophy.

Please reconsider and vote in favor of the resumption of GESMO, as it is in the best interest of the United States of America.

Sincerely,

F.A. Panzani
