Reference: Docket No. 71-0046

Gentlemen:

A careful review of the documentation concerning Teledyne Energy Systems' Quality Assurance Plans for our Sentinel and Protective Packaging product lines indicates that the former formerly approved plan has been inadvertently cancelled. This circumstance occurred because a new docket number was not assigned to the Protective Packaging Quality Assurance Plan when it was submitted on 20 February 1980.

Teledyne Energy Systems' intentions were that the Sentinel Quality Assurance Plan, which was approved as Docket No. 71-0046, Revision O, dated 1 November 1979, would remain in force and not be cancelled. The Protective Packaging Quality Assurance Plan, a separate document, also required approval, therefore should have had a new docket number. The simplest solution to the problem appears to be to leave the Protective Packaging Plan on Docket No. 71-0046 and assign a new docket number to the Sentinel Plan, then reinstate the plan.

The contact for discussion of the content of these two plans is Mr. William A. McDonald, Manager of our Quality Operations. In his absence please contact me.

Sincerely,

John W. McGrew
