DESCRIPTION OF MATERIALS OR FACILITIES

The equipment consists of two nuclear steam supply systems. Each system consists primarily of a pressurized light water nuclear reactor, two steam generators, four primary coolant pumps, and associated piping. In addition, the nuclear steam supply system contains auxiliary fluid and electrical equipment systems to control the operation of the reactor and safety and protection systems. Name of installation is Yenliao Power Station, Units 7 and 8.

The design power level is approximately 900 electrical megawatts.

The total value of items to be exported from the United States under this license is approximately \$250,000,000.

(Continued on page 2, Docket No. 11002252).

Neither this license nor any other under this license shall be assigned or otherwise transferred in violation of the provisions of the Atomic Energy Act of 1954, as amended and the Energy Reorganization Act of 1974.

This license is subject to the right of recapture or control by Section 108 of the Atomic Energy Act of 1954, as amended and to all of the other provisions of said Acts, now or hereafter in effect and to all valid rules and regulations of the Nuclear Regulatory Commission.
