

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FEB 3 1981

Docket Nos. 50-352
and 50-353

APPLICANT: Philadelphia Electric Company
FACILITY: Limerick Generating Station
SUBJECT: SUMMARY OF MEETING WITH ACORN, LIMERICK GENERATING STATION

On Monday, January 19, 1981, a meeting was held between H. Denton and members of ACORN, Philadelphia, concerning the construction and licensing of Limerick Generating Station. A list of attendees is enclosed.

A principle concern of the ACORN representatives was how to make their feeling known with respect to the development of siting criteria. Specifically they asked that public meetings/hearings be held in the Philadelphia area. H. Denton indicated that, although actual development of the criteria would be done under the auspices of another office, he would support their request for meetings, one or more, in Philadelphia. A memorandum to Standards is in preparation.

C. Woodhead provided a more detailed explanation of the licensing process and the role which ACORN can play in that process. She promised to send the Commission's rules of practice. This has been done.

A question was asked concerning a report entitled, "Residual Fuel Oil-Demand and Supply." An attempt will be made to identify the source.

H. Denton committed the staff to perform an analysis of the Limerick site using the illustrative examples that were provided with the recommendations of the siting policy task force. It was pointed out that the numbers given in those examples were necessarily for illustrative purposes and were not intended by the task force to be representative of the values that will be established for new sites when final criteria emerge from the rulemaking process now being undertaken.

8103120 411

Mr. Denton indicated that it would not be at all surprising to find, using the number of these illustrative examples as criteria, that Limerick would not conform to such illustrative criteria. A request for this analysis is in preparation.

Don Sells, Project Manger
Licensing Branch No. 2
Division of Licensing
