Docket No. 30-14521

Digital Equipment Corporation
ATTN: Mr. R. Schultz
Plant Manager
180 Milk Street
Westboro, Massachusetts 01581

Gentlemen:

Subject: Inspection 81-01

This refers to the routine safety inspection conducted by Mr. C. Rowe of this office on May 13, 1981 of activities authorized by NRC License No. 20-18125-01 and to the discussions of our findings held by Mr. Rowe with Mr. V. Nazario of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Within the scope of this inspection, no items of noncompliance were observed.

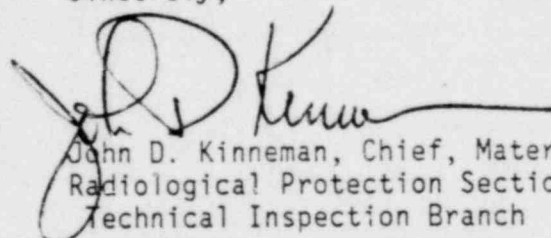

From the discussions at the conclusion of the inspection, it is our understanding that you plan to dispose of your Trio-Tech Krypton-85 unit and have no plans for use of licensed material in the near future. Additionally, we understand that you will conduct a close-out survey and request termination of your byproduct material license upon completion of this action.

If our understandings are incorrect, please inform us in writing.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.

No reply to this letter is required; however, should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

John D. Kinneman, Chief, Materials
Radiological Protection Section,
