DOCKET 50-155 - LICENSE DPR-6 -
BIG ROCK POINT PLANT - CLARIFICATION OF
PROPOSED TECHNICAL SPECIFICATIONS CHANGE
REQUEST - ADMINISTRATIVE CONTROLS - SECTION 6

Consumers Power Company letter dated February 16, 1981 requested various changes to Section 6 of the Big Rock Point Plant Technical Specifications. The purpose of those requested changes was to incorporate previously requested changes into a single updated request, to add additional clarifications and to incorporate a Shift Technical Advisor (STA) requirement. The intent of the requested changes was to bring the Big Rock Point Plant Technical Specifications into closer agreement with those of our other plants and the Standard Technical Specifications.

Discussions have occurred with the NRC staff as a result of their review of our request. These discussions have resulted in our agreement to make some additional changes as requested. An updated set of the proposed page revisions are attached to provide both the previously requested changes and the additional changes. A summary of the additional changes (not included in our February 16, 1981 request) is provided by the attached Request for Change to the Technical Specifications - License DPR-6. No fee for this change request is included because it is considered a part of our February 16, 1981 change request.
