Docket No. 030-08048

Advanced Radiation Services, Inc.  
ATTN: Mr. Anton S. Kurtz  
President  
1079 E. Grand Street (Rear)  
Elizabeth, New Jersey 07201

Gentlemen:

Subject: Inspection 030-08048/80-01

This refers to your letter dated September 24, 1980, in response to our letter dated July 29, 1980.

Thank you for informing us of the corrective and preventive actions you documented in response to our correspondence. However, your letter has been reviewed and additional information is found to be needed.

1. In response to item C, please indicate whether you have obtained a permanent storage facility. Please confirm that a description of the facility has been submitted to the USNRC, Materials Licensing Branch, Washington, D. C. 20555 for approval.
2. In response to item F, you failed to provide the corrective steps taken by you to ensure that the pocket dosimeters used by your radiographers are checked for correct response to radiation.
3. In response to item I, you reference your response to a similar item of noncompliance identified during a previous inspection. Please indicate your corrective action relative to this recurrent instance of noncompliance. You are advised that recurrent items of noncompliance are given additional weight in the consideration and selection of appropriate enforcement action.
4. In response to item J, we incorrectly identified the isotope contained in the unmonitored incoming packages as cobalt-60 rather than iridium-192. Please indicate your corrective actions to ensure that all incoming packages are surveyed as required.

Please respond to this office within seven (7) days of receipt of this letter a written statement containing the requested information.

Sincerely,

Boyce H. Grier  
Director
