

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION I
631 PARK AVENUE
KING OF PRUSSIA, PENNSYLVANIA 19406

20 FEB 1981

Docket No. 40-7106

J.R.M. Bege Company
ATTN: Dr. R. M. Langer
46 Park Street
Arlington, Massachusetts 02174

Gentlemen:

Subject: Notice of Violation

This refers to the telephone discussion between Mr. C. A. Rowe of this office and yourself on January 19, 1981. The subject of the discussion was the fact that NRC records show that the Source Material License identified above has expired and no renewal application has been filed in accordance with Section 40.43 of Title 10, Code of Federal Regulations, Part 40.

From our discussion with your representative we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 40.3, 10 CFR Part 40. Section 40.3 states:

40.3 LICENSE REQUIREMENTS. No person subject to the regulations in this Part shall receive title to, own, receive, possess, use, transfer, or deliver byproduct material as defined in this Part or any source material after removal from its place of deposit in nature, except as authorized in a specific or general license issued by the Commission pursuant to the regulations in this Part.

This Notice of Violation is sent to you under the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Section 2.201 requires you to submit to this office a written statement or explanation in reply including: (1) corrective steps which have been taken by you, and (2) corrective steps which will be taken to avoid this happening in the future.

Also, you must immediately place the radioactive material on hand in secure storage until such time as you acquire a valid license. No other use of the material on hand or purchase of additional byproduct material is authorized. Include a statement in your reply to this Notice of Violation confirming that you have taken this action and describing the controls that will be exercised over the stored material until such time that you obtain a valid license.

20 FEB 1981

Your reply to this Notice of Violation shall be sent, within twenty (20) days of the receipt of this letter, to Region I, U. S. Nuclear Regulatory Commission, Attention: Chief, Materials Radiological Protection Section, Fuel Facilities and Materials Safety Branch, 631 Park Avenue, King of Prussia, Pennsylvania 19406. The reply must include a copy of the statement and reports required by the items above.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31 of 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.

We request that you give prompt attention to these matters. Should you have any questions regarding them, we would be pleased to discuss them with you.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and your reply will be placed in the Public Document Room.

Sincerely,

A handwritten signature in cursive script, appearing to read "John D. Kinneman". The signature is written in dark ink and is positioned above the typed name and title.

John D. Kinneman, Chief
Materials Radiological Protection
Section
