In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

In our review of the Sequoyah Nuclear Plant unit 2 technical specifications issued June 25, 1981, we have discovered several minor administrative errors. The enclosed pages identify these errors. We request that you revise these pages and reissue them as part of the first routine amendment to the Sequoyah unit 2 technical specifications.

The error identified on enclosed page 3/43-12 also occurred in Amendment 7 to the Sequoyah unit 1 technical specifications. It should be corrected in the next routine amendment for unit 1.

These errors have no impact on the conduct of operations at Sequoyah and are necessary only to clean up the documents.

If you have any questions, please get in touch with D. L. Lambert at FTS 857-2581.

Very truly yours,
