Dear Mr. Hancock:

SUBJECT: BULLETIN 80-06 ENGINEERED SAFETY FEATURES RESET CONTROLS

We have completed our review of the information you provided in letter dated June 12, 1980 in response to IE Bulletin 80-06 for Crystal River Unit No. 3 (CR-3). The enclosed Safety Evaluation addresses your response. In your letter of June 12, 1980 you committed to test the Engineered Safety Features to demonstrate that all equipment remains in its emergency mode upon removal or manual resetting of activation signals. Our Office of Inspection and Enforcement has confirmed that this test was satisfactorily completed. Therefore, we have determined that your response to I&E Bulletin 80-06 is acceptable and that this issue is closed for CR-3. Our Safety Evaluation is enclosed.
