SUBJECT: PLATEAU RESOURCES LIMITED SHOOTERING CANYON MILL,
SURFACE AND GROUNDWATER REVIEW OF 10 CFR 40.65
(1980-2) REPORT

The Shootering Canyon Uranium Mill has not been operational to date. Therefore, no radiological releases to surface or ground water have occurred due to activities at this mill.

The NRC's primary concern at this point is to insure that the licensee has established adequate baseline data. Data for the baseline monitoring program is being reviewed. This review and any necessary follow-up actions will be documented in a separate memo.
