Gentlemen:

We are currently in the process of evaluating the preoperational environmental monitoring program for the Morton Ranch Project, and in order to thoroughly review the program the following information is requested:

1. Depths to which monitor (and water) wells are completed, and well logs supporting this information.
2. Locations of screened interval(s) for each well.
3. The location of wells, other than WW-1, WW-2, and WW-4, within 2 km. of the site which may be sources of potable water.

Your response to this request by July 31, 1980 will be appreciated, and if you have any questions concerning this matter, feel free to contact Frank Anastasi of my staff at 427-4393.

Sincerely,

Original Signed by:
J. J. Linehan
