U.S. NUCLEAR REG.  
COMMISSION  
MAIL SECTION

Material Licensing Branch  
United States Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

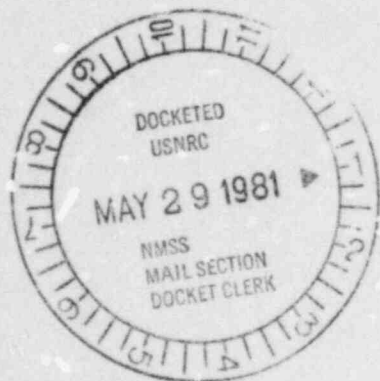

As a result of recent retirements, we have only one staff member currently licensed and authorized to use or supervise the use of licensed material. We now seek to add the name of Boyd D. Nash to our licenses to serve as a back-up person to Dr. Arne Landsberg, our current RPO. Mr. Nash completed a course in Radiochemistry at Idaho State University and has recently completed the Radiation Safety Specialist training program given by Oklahoma State University. He is currently our safety manager and nuclear materials representative at the Albany Research Center.

We seek to amend licenses SNM-515 and 36-01142-03 to read under condition number 12, "Licensed material shall be used by or under the supervision of Arne Landsberg or Boyd D. Nash."

If you require further information, please contact Boyd D. Nash, Safety Manager, Albany Research Center, Bureau of Mines, U. S. Department of the Interior, P. O. Box 70, Albany, Oregon 97321, telephone FTS 420-5883.

Sincerely,

F. E. Block  
Research Director  
Albany Research Center
