Re: Freedom of Information Act Request

Dear Mr. Felton:

On April 3, 1981, the NRC's Staff conducted a briefing for Commissioner Bradford on the Commission's fire protection research program. The Commission subsequently made a transcript of the briefing available.

One of the topics of discussion at the briefing was the upcoming replication testing by Underwriters Laboratories of the Browns Ferry nuclear plant (transcript, pp 33 - 44). Pursuant to the Freedom of Information Act, Debevoise & Liberman requests copies of all records addressing or discussing the Browns Ferry tests, including the project plans, records containing the purpose(s) of the tests, and correspondence between UL and the Commission regarding the tests.

We understand that "record" has the meaning given in 10 C.F.R. §9.3a(u).

We request that these records be provided with all possible speed, and in no event later than the 10 working days specified by 10 C.F.R. §9.8.

Very truly yours,

*McNeill Watkins II*
