

OFFICE OF THE
COMMISSIONER

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

June 25, 1981

MEMORANDUM FOR: William Dircks, Executive Director
for Operations
PB

FROM: Peter A. Bradford

SUBJECT: MILLSTONE UNIT 1 RADIOACTIVE RELEASE VIA STORM
DRAIN

My office had been told that releases to the environment via storm drains (like the Tsuruga reactor event) were not possible in the U.S. reactor due to SRP's, Reg Guides, and inspections during construction. Is the Millstone Unit 1 storm drain system representative and allowable?
