

In the Matter of:

GENERAL ELECTRIC COMPANY

(GE Morris Operation Spent)
Fuel Storage Facility

Docket N. 70-1308 OLA

July 17, 1981

Re: NOTICE, July 2, 1981 - ORDER CANCELLING AND RESETTING PREHEARING CONFERENCE

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

ATOMIC SAFETY AND LICENSING BOARD
Before Administrative Judges:
Andrew C. Goodhope, Chairman
Dr. Linda W. Little
Dr. Forrest J. Remick

Am sending a copy of this letter to all on the service list and requesting my additional CONTENTION: be added to my original CONTENTIONS, per my Limited Appearance of March, 1980, my Letter of May 5, 1980, be considered at the rescheduled prehearing conference. If at all possible, I request that Mr. Van Vranken of the State of Illinois' Attorney General Office to read this for me, at the Prehearing Conference. As I had every intention of attending the original date of July 23, 1981, when your notice of July 2, 1981 arrived, I had already committed myself to being out of the State of Illinois on August 6th, 1981. I will be in Ohio by the late afternoon, for the evening, on my way to the National Conference of Homemakers, at the University of New Hampshire. I am pre-registered. And can not cancel. A copy of my original contention, my letter of May 5, 1980 and the additional Contention are enclosed.

DS03
1/0

ADDITIONAL CONTENTION:

G.E. request for re-licensing of the spent Fuel Pool for 20 years, is dangerous! As the 20 year renewal if granted, would exceed the life span of the Spent Fuel Pool. Therefore I request the Atomic, Safety & Licensing Board deny the renewal request of G.E. for the Morris Plant, on the grounds the Spent Fuel Pool is not guaranteed or safe, for the additional 20 year renewal request.
