In Re: Materials License #35-19471-01

Dear Mr. Guinn:

Please find enclosed a copy of our materials license. As per phone conversation of a week ago, here is a written request of the following changes:

Item 12 - Changed temporarily to read . . . "under the supervision of Pat Webb." (Letter from PA Incorporated stating his completion of course enclosed.) And changed permanently to read . . . "under the supervision of a qualified operator." Operators will be trained under the John F. Domatti, P.E., Radiation Safety Course. An outline of his course is enclosed.

Item 15 - For the physical inventory we will be using form #R-150 instead of form #2160, as listed.

If there is anything that I have omitted or forgotten to enclose please let me know and I will get it to you. We will be waiting for your response. Thank you for your time.

Respectfully yours,

Chris Naething
