

CONFERENCE OF RADIATION CONTROL PROGRAM DIRECTORS, INC.

P. O. Box 148
Concord, New Hampshire 03301

DOCKET NUMBER
PROPOSED RULE PR-30,40,70
(46 FR 29712)

July 20, 1981

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

This is to acknowledge that the Conference of Radiation Control Program Directors, Inc. has received a copy of the Advance Notice of Proposed Rulemaking for Upgrading Emergency Preparedness for Certain Fuel Cycle and Materials Licensees, as published in the Federal Register, Vol. 46, No. 106, Wednesday, June 3, 1981.

I feel the Conference will make comment to the proposed rulemaking, but cannot make such comment on or before the August 3, 1981 comment date. This delay is due to assigning the review of the proposal to our Committee on Emergency Response Planning, which will not meet until the middle of August.

Therefore, we would like to be granted a sixty day extension for final receipt of our comments to allow this Committee the opportunity to review the proposal. Your favorable response to this request will be appreciated.

Yours very truly,

John R. Stanton

John R. Stanton, Chairman
Conference of Radiation Control
Program Directors, Inc.
