Re: Trojan Nuclear Plant
Docket No. 50-344

Dear Charles Trammell:

It has come to our attention that the Port of Kalama is intending to build a three-ship berth and coal port across from the Trojan plant. It is our understanding that certain changes must be made in the exclusionary boundry to accomodate this port.

Please send our office any information on this subject.

For a non-nuclear future,

Nina Bell
Staff
