OELD  
OIE (3)

As discussed with Mr. Homer C. Schmidt during a phone conversation on July 9, 1981, we have issued the Comanche Peak Safety Evaluation Report (SER). Further, we have deferred scheduling the Comanche Peak review by the Advisory Committee on Reactor Safeguards (ACRS) until such time that sufficient information has been provided to resolve the large number of open issues. The SER lists as outstanding; 29 non-TMI items and 19 TMI related items. In addition, we note that the SER includes a shorter list of confirmatory issues, some of which could be fully resolved within the near future.

We understand that you will be providing additional information on many of these items during July and August in accordance with a letter from Mr. Schmidt dated July 7, 1981.

We recommend that your staff meet with us to discuss the outstanding issues listed in the SER, any revisions to the letter of July 7, 1981, and to ensure that we have a mutual understanding of the NRC staff requirements to resolve these matters.

I urge you to give these matters your personal attention so that they may be resolved promptly. Based upon an assessment of the issues and information needed to resolve them, as well as the results of the recommended meeting between our respective staffs, we will subsequently establish a schedule for the issuance of Supplement No. 1 to the SER and the ACRS meeting.
