Dear Mr. Kay:

The Commission has issued the enclosed Amendment No. 69 to Facility Operating License No. DPR-3 for the Yankee Nuclear Power Station (Yankee-Rowe) in response to your submittal of March 26, 1981, as revised by your letters dated May 27, 1981 and July 8, 1981.

The amendment incorporates provisions into the Technical Specifications required for operation with the refueled Core XV, and associated with modifications made to the main steam non-return valves and the auxiliary feedwater system.

During our review of your proposed amendment we found that changes and additions were necessary to meet our requirements. We have discussed these changes with your staff and they have agreed with them.

Copies of our related Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Original signed by
