Docket No.: 50-341

APPLICANT: Detroit Edison Company
FACILITY: Fermi 2
SUBJECT: SUMMARY OF MAY 18-21, 1981 MEETING REGARDING OPERATING LICENSE REVIEW

The purpose of the meeting was to conduct an audit of Detroit Edison corporate and Fermi 2 plant personnel who will manage the operation of the Fermi 2 plant. NRC personnel participating in the audit were: F. Pedersen, team leader, and R. A. Benedict, member, Licensee Qualification Branch, Office of Nuclear Reactor Regulation; Bruce Little and Paul Byron, Resident Inspectors for Fermi 2, Office of Inspection and Enforcement; and J. D. Smith, Region III, Office of Inspection and Enforcement. Detroit Edison personnel included: C. Heidle, then Executive Vice President of Operations; W. H. Jens, Vice President, Nuclear Operations; H. Tauber, Vice President, Engineering and Construction; E. Griffing, Fermi 2 Plant Superintendent; W. Fahrner, Fermi 2 Project Manager; and W. R. Holland, Manager of Nuclear Operations.

The NRC team reviewed the organizational structure for operation and support of the plant staff, the levels of staffing; the experience level of principal individuals of both corporate and plant staffs and the interfaces between the plant staff and the corporate structure.

Beginning with a meeting at DECo's corporate office in Detroit, the applicant provided the review team with thorough briefing on its organization for the operation of Fermi 2. This briefing was followed by discussions with several corporate personnel so that the review team could gain a feeling for the responsibilities and attitudes of the individuals, an understanding of how they fit into the organization, and how they interface with other onsite and offsite organizational units. Discussions with plant personnel were also held at the site to obtain the same type of information. At the conclusion of the corporate and plant management meetings, the (NRC) team presented the results of the audit to the DECo management.

Results of our review are presented in Section 13.1 of the Fermi 2 Safety Evaluation Report (NUREG-0798).
